

CONO pendo SMART

The smart pending wireless loudspeaker

The suspended sound solution with state-of-the-art wireless technology

The CONO pendo SMART is a wireless speaker with an integrated digital amplifier. Music is received wirelessly at a distance of up to 120 metres via the 1.9 Ghz band from the NewTec SMARTplayer. Any number of speakers can be used. The volume of each individual speaker can also be adjusted on the fly using the remote control. The speaker housing is made of glass fibre reinforced ABS. In the standard version, the flexibly adjustable wire length of the suspension is 1.5 metres. Other lengths can be supplied on request.

Technical Data

Application	Pendulum speaker
Design	
Colours	● ○ ●
Dimensions	Ø 134 x 150 mm (without cable and canopy)
Material housing	Glass fibre reinforced ABS plastic
Sound	
Principle	360° - Speaker with integrated amplifier and wireless module
Output power	40 W RMS
Equipment	NewTec KA10 loudspeaker 50W 4Ω
Efficiency	85.5 dB
Max. SPL	103.5 dB
Frequency response	105-21,000 Hz
Radio frequency	1.9 GHz n-DECT
Transmitter	SMARTplayer
Installation	
Weight	1.53 kg
Power supply	AC 100-240 V; 50/60 Hz; 0.5 A
Connections	Power cable
