Advantages

360° Sound

Our patented aluminum membrane technology delivers natural and uniform 360° sound distribution throughout any space.

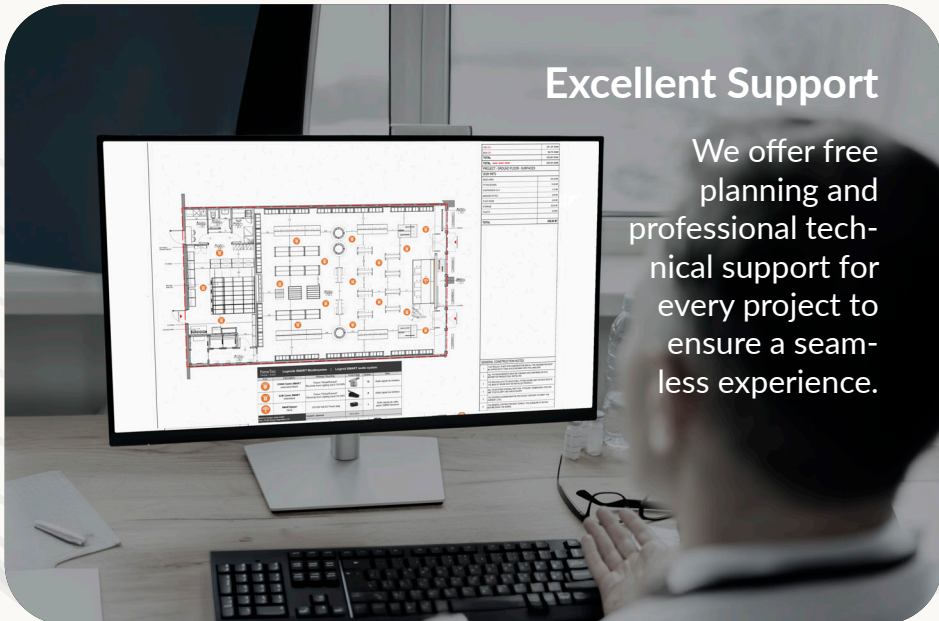

Versatility & Design

NewTec speakers suit any use case or environment, with models for all installation types and sizes, available in both wired and wireless options.

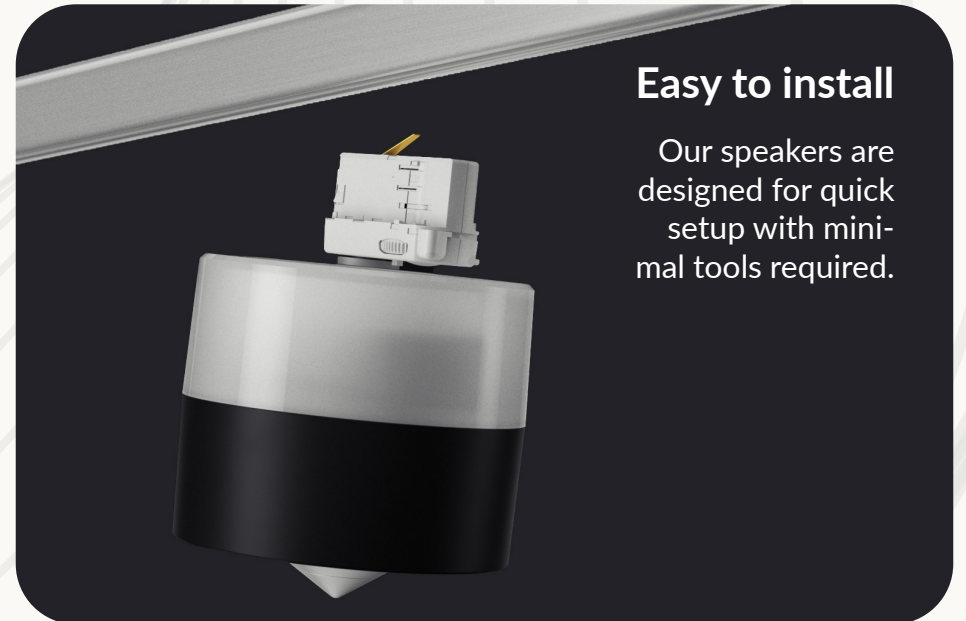

Excellent Support

We offer free planning and professional technical support for every project to ensure a seamless experience.

Easy to install

Our speakers are designed for quick setup with minimal tools required.

Advantages

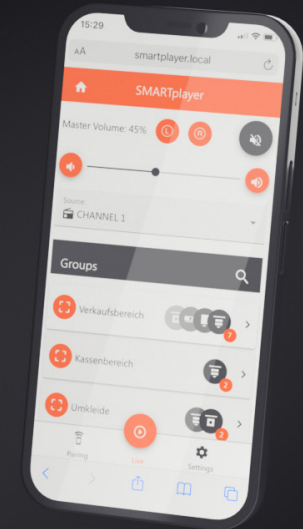

Certified Partnership

We foster long-term collaboration by offering training, certifications, and dedicated support to our partners.

Easy Control

Manage your audio systems effortlessly with the SMART Audio App and get remote access, control and monitoring with the NewTec Cloud.

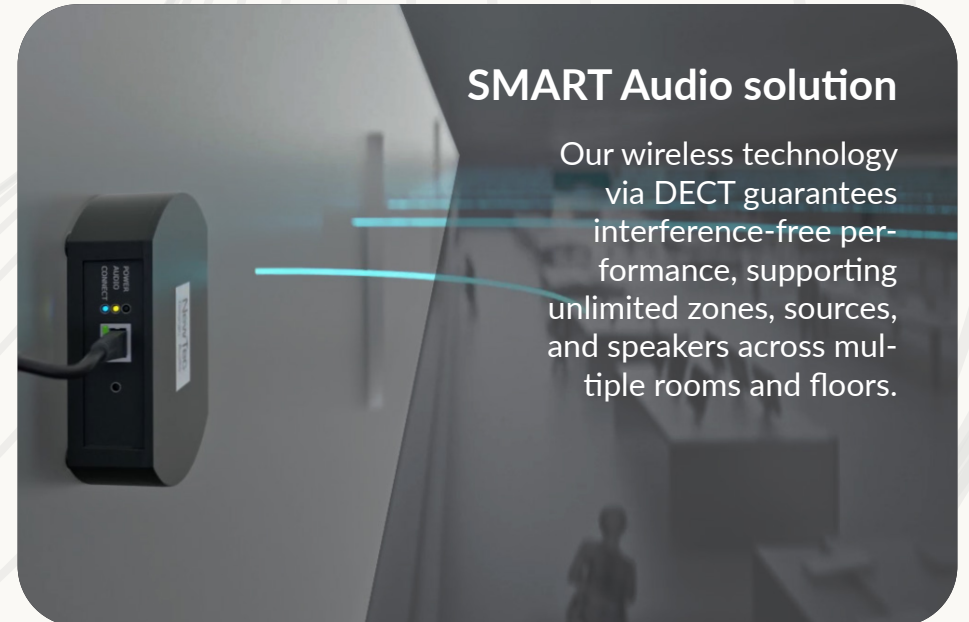

Made in Germany

Proudly crafted in Germany, our products are built to the highest quality standards.

SMART Audio solution

Our wireless technology via DECT guarantees interference-free performance, supporting unlimited zones, sources, and speakers across multiple rooms and floors.

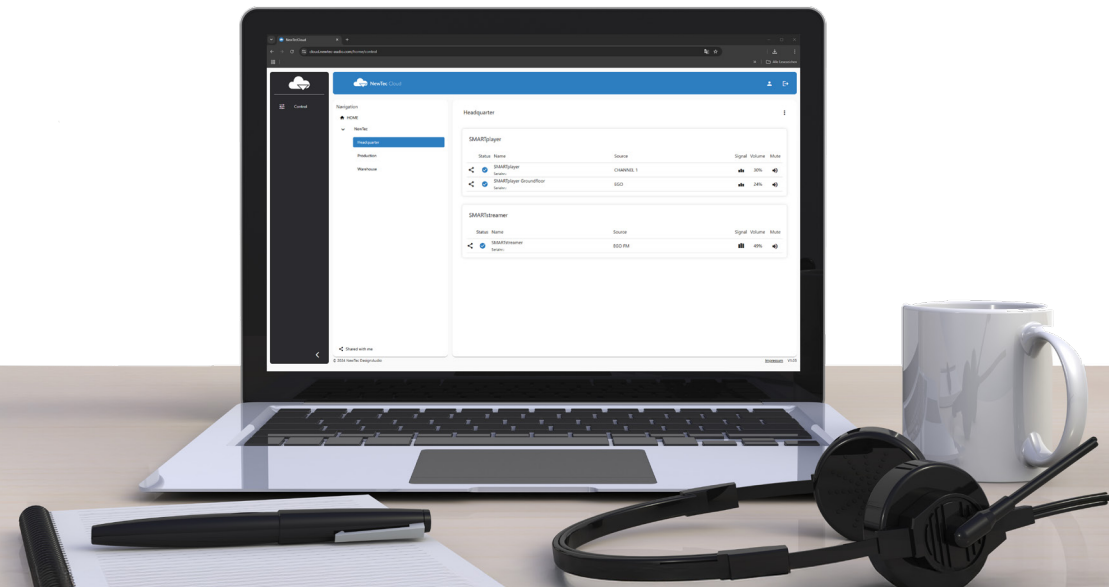

Control your audio experience anytime from anywhere!

Remote. Control your audio experience anytime and from anywhere - at no additional cost.

Easy. Customize audio systems to the customer's wishes with a single mouse click, live and in real time.

Flexible. Manage maintenance, control and support conveniently and securely via remote access, whether through your smartphone or from your desk.
